

INCURSION RESPONSE RESEARCH INDEX

Document Title	Author	Date	PDF
Modelling the efficacy of different sampling strategies for estimating disease levels and detecting the spread of new pests	D. Kriticos, A. Leriche, L Bulman, M Kimberley, S.Alcaraz, B Richardson	Mar 2008	01
Validation of the Spraytrans Model for Prediction of Long-Range Pesticide Spray Drift : Progress Report	B Richardson, H Thistle, D Thompson, S Gous	Jun 2007	02
Improving predictions of pest mortality prior to pest eradication operations: Part II : The influence of aphagostimulant on the efficacy of Bacillus thuringiensis var. kurstaki	M Kay	May 2006	03
Improving predictions of pest mortality prior to pest eradication operations: Part III : The influence of the host plant on the susceptibility of the painted apple moth to a viral pathogen	M Kay	May 2006	04
Improving predictions of pest mortality prior to pest eradication operatiois: The influence of host species and provenance on the efficacy of Bacillus thuringiensis var. kurstaki	M Kay, K Steele, P Taylor, D Jones	Jun 2005	05
